

Heaklig Ayala, University of Warwick

Heaklig Ayala is currently a candidate to the Degree of Doctor of Engineering (EngD) in Wide-Bandgap Power Electronics through an industry-focused programme. As such, he is part of the Centre for Doctoral Training in Future Mobility Technologies at the University of Warwick, and also associated with the Wide-Bandgap Stream of the CDT. His main research concerns advanced packaging of wide-bandgap power devices for enhanced integration, improved converter efficiency and reliability.
