

Jeff Kettle is Professor of Electronic Engineering at the James Watt School of Engineering at the University of Glasgow. He studied at Cardiff and Swansea Universities and worked on III-V LEDs. His current research is focused on electronic manufacturing, semiconductor packaging, sustainability in electronics and reliability improvement.

During his time as a lecturer, he acquired grant funding from the EPSRC, Royal Society, Royal Academy of Engineering, Interreg, Welsh Government, InnovateUK and European Commission, worth around £6m. He has around 60 journal publications including many in high-impact journals such as Nature Energy.
