1st International Conference on **Responsible Electronics and Circular Technologies**

11-12 November 2025, Glasgow, UK

Join academic and industry experts as they showcase the state-of-the-art in sustainable ICT, from materials to systems, spanning from fundamental technologies to high-TRL solutions.

You can expect invited keynotes, industry collaboration pitches, panel discussions, and an exhibition from leading research groups.

Call for Contribution: We welcome oral and poster papers in all areas of sustainable and green electronics, including:

- Degradable and low-waste electronic materials
- Electronic packaging and PCB technologies for sustainability
- Additive manufacturing in electronics
- E-waste recycling chemistry
- Organic electronics and solution-processed devices
- Sustainability in semiconductor materials & manufacturing
- Life Cycle Assessment (LCA) of modern electronics
- Emerging applications in healthcare, energy, and sensing
- IoT and Digital Twin solutions for sustainability

Exhibition: Limited opportunities for showcasing your technology are available. Contact us for more information - react@gla.ac.uk

Registration:
Registration will open from June. Discounted and free registration options will be available

Open Access Indexed Proceedings

engineering proceedings

+ IEEE Journal Special Issue planned

Call for Papers Key Dates

Paper Abstract Submission
Deadline: 28 June 2025
